ALLOWING INSTALLATION OF AC AT RAILWAY QUARTER :

It is being experienced that a number of Railway Employees are keen on installation of AC at their Railway Quarter but the administration is denying the same causing serious resentment to the Railway Employees. It is commonly known that a number of railway employees like Running Staff and other staff who although eligible for Type-III or Type-II Quarter are being forced to live in Type-I or even Type-IV Quarter due to scarcity of better type quarter and it is very much inconvenient for them to take proper rest in the extreme weather condition which is also unsafe for safe operations. Accordingly the Railway Employees may be allowed for installation of AC at their Railway Quarter for which they should be paid the installation charges and any additional charges as decided by the authority as charged by the State Government.

Last Decision:

PCEE: Guidelines issued by RS in 2016 will be reiterated. Proposal for allowing AC in Type-I & II quarter will be sent to Rly Bd.

Present Remarks:

PCEE: Railway employees who are eligible for Type-III, Type-II qtrs but staying in Type-I due to scarcity of Qrs. (Type-III & II) will be allowed for installation of AC at their Rly. Qtrs
