Sub: Redistribution of 64 bit GUI Thin Clients.

To achieve 100% digitilization in UTS/PRS counters, 64 bit GUI thin clients (complete set) which are kept as spare in your division are to be sent to PRS/SC/Stores on or before 31-08-2024, for reconfiguration and redistribution to locations where 64 bit GUI thin clients are not installed over SCR.

To ensure uninterrupted ticketing at the locations, the old 32 bit thinclients may be used as standby thinclients in the event of any failure.

Matter most urgent.
