Sub: Important precautions to be taken regarding Experimental stoppages &TOD Spls

In the recent past, on some occasions it is noticed that information regarding notification of TOD Special trains and introduction / removal of experimental stoppage has not been passed down to all concerned field staff causing confusion.

In view of this ,to avoid public complaints and confusion among the field staff:

- 1) The commercial controller of the concerned division should give control message and also by other means to ensure that the necessary information reaches to the field staff.
- 2) Concerned section controller in division should give control message and alert the concerned stations about the date of commencement of experimental stoppage and the end date and take acknowledgment.
- 3) Divisions should ensure the information regarding Experimental stoppages through SOB to all crew lobbies.
Matter most important
