Sub: - Capturing of details of service providers on e-Smart task in FOIS/TMS.

FOIS has been upgraded from time to time to provide facilities to its internal users as well as IR's valued customers. Keeping in view of the development of freight business, it has been decided that the freight customers (existing & new) will be facilitated by providing details of logistics partners. The FOIS application has been modified to capture such information from the various service providers where Railway Authorities (Goods Clerk) at TMS (P3) locations register themselves in FOIS/SMART. The same can be disseminated to our valued customers through FOIS Web Site or IR-Sugam App. This will provide Value Added services to freight customers and logistics service providers to reach out each & other.

While viewing the details of data feeding for freight business development it is noted that on SCR out of 151 goods sheds there is no data fed in on 69 goods sheds about service providers. The list of such goods shed is enclosed.

You are requested to personally look into it and get the data fed in at these pending locations by 15 Dec positively.

Da: As Above.
